# Bring Solutions, Not Problems: The 5 Levels

**Level 4 is the minimum for every Alpine team member, regardless of role, from day one. Level 5 is the goal.** Own the problem in front of you first. Every level up means a faster fix, fewer calls up the ladder, and fewer repeat problems.

**Stop at Level 4 and escalate** for a safety issue, anything outside your licence or scope, or a decision with real cost or customer impact. Bring a recommendation when you do.

| Level | What you do | What it sounds like |
|---|---|---|
| **1. Flag it** | Report the problem | "We don't have the scissor lift. What do you want me to do?" |
| **2. Find the cause** | Add why it happened | "It never made the job notes. What do you want me to do?" |
| **3. Bring options** | Add possible solutions | "We can rent one or rebook. Which do you want?" |
| **4. Recommend one** | Add your recommendation. **The Alpine minimum.** | "I recommend the rental so today's work still gets done." |
| **5. Fix it and future-proof it** | Fix it, future-proof the problem, and keep leadership in the loop | "I rented one and added lift access to our handoff notes so it doesn't happen again." |

**Future-proof the problem:** find why it happened, change what caused it, and teach the team. Same levels in the office and in sales.

**Quarterly review.** Team member: _____ Quarter: _____ Date: _____

| Review | Team member's notes | Leader's notes |
|---|---|---|
| Level this quarter (1 to 5) | | |
| Best Level 4 or 5 example | | |
| Problem future-proofed | | |
| Focus for next quarter | | |
